Index to volume 63

Author index

A

Adkinson NF Jr (*See* Schellenberg and Adkinson), 15
Akiyama K, Miyamoto T, Horiuchi Y, 354
Alomar A, Giménez-Camarasa JM, de Moragas JM, 15 (Abst.)
Altenau P (*See* Brooks SM et al), 401
Anderson M (*See* Trembath PW et al), 395
Anderton RC, Cuff MT, Frith PA, Cockcroft DW, Morse JLC, Jones NL, Hargreave FE, 315
Anuras JS, Richerson HB, Butler JE, Richards DW, 122
Arbesman CE (*See* Wypych JI et al), 267
Arnaud A (*See* Vervloet D et al), 348
Arroyave C (*See* Simon RA et al), 281
Arroyave CM, Schatz M, Simon RA, 276

B

Bacal E (*See* Patterson R et al), 47
Barbee RA (*See* Brown WG et al), 328
Barboriak JJ (*See* Chryssanthopoulos C et al), 321
Baur X, Fruhmann G, 20 (Abst.)
Bernstein IL (*See* Brooks SM et al), 401
Bessot JC (*See* Pauli G et al), 245
Birkeland SA, 3 (Abst.)
Bloch KJ (*See* Dattwyler RJ et al), 412
Bock SA, Lee W-Y, Remigio L, Holst A, May CD, 21 (Abst.)
Borum P, 253
Bosomba A, Pelaez A, Villalmanzo IG, Campos A, 4 (Abst.)
Boyd GK (*See* Noyes JH et al), 242
Brooks SM, McGowan K, Bernstein IL, Altenau P, Peagler J, 401
Brown WG, Halonen MJ, Kaltenborn WT, Barbee RA, 328
Butler JE (*See* Anuras JS et al), 122
Byers VS (*See* Epstein and Byers), 111

C

Campbell I, Hill A, Middleton H, Momen M, Prescott R, 1 (Abst.)
Charpin J (*See* Vervloet D et al), 348
Chryssanthopoulos C, Maksud MG, Funahashi A, Hoffmann RG, Barboriak JJ, 321
Cockcroft D, Ruffin R, Hargreave F, 15 (Abst.)
Cockcroft DW (*See* Anderton RC et al), 315
Cove-Smith JR, Kabler P, Knapp MS, Pownall R, 23 (Abst.)
Craps L, Greenwood C, Radielovic P, 5 (Abst.)
Cronholm LS (*See* Hunjan and Cronholm), 361
Cuff MT (*See* Anderton RC et al), 315
Curry N (*See* Simon RA et al), 281

Subject index

A

Absorption of oral theophylline, relation of production formulation to, 10 (Abst.)
Adrenergic therapy, decreased beta-adrenergic receptors on polymorphonuclear leukocytes after, 11 (Abst.)
Aerosolized terbutaline in asthmatics (Weber RW et al), 116
Agammaglobulinemia, lymphocyte ecto-5′-nucleotidase deficiency in, 26 (Abst.)
Airway(s), large, constriction in allergic rhinitis; response to inhalation of helium-oxygen (Fairshter RD et al), 39
lability, atopy, and cystic fibrosis, 22 (Abst.)
Allergen(s) extracts, new method of standardization of potency of (Akiyama K, Miyamoto T, Horiuchi Y), 354
-induced asthma, effect of Sch 1000 in, 15 (Abst.)
mouse, characterization of (Siraganian RP, Sandberg AL), 435
two independent, assessment of influence of irrelevant IgE on allergic sensitivity to (Schellenberg RR, Adkinson NF Jr), 15
Allergenic extracts, optimization of parameters in protein nitrogen unit precipitation procedure for (May JC et al), 87
Allergenicity, reduced, of high molecular weight ragweed polymers (Patterson R et al), 47
Allergic, anti-, effects, prophylactic, in bronchial asthma, clinical investigation of agents with, 5 (Abst.)
asthma, cockroach cause of (Kang B et al), 80
and nonallergic children, comparison of tetanus and diphtheria IgE antibody in; IgE synthesis in man (Nagel JE et al), 308
photo-, urticaria, induced by visible light; additional cases and further studies, 11 (Abst.)
reactions caused by food allergens, effect of orally administered sodium cromoglycate on, 8 (Abst.)
papain-induced, 7 (Abst.)
rhinitis, large airway constriction in; response to inhalation of helium-oxygen (Fairshter RD et al), 39
new intranasal steroid for treatment of; flunisolide, 19 (Abst.)
symptoms, seasonal, suppression of, with daily hydroxyzine (Schaaf L et al), 129
Allergist, practicing, and circulating immune complexes (Kohler PF), 297 (Editorial)
Allergy(ies), American Academy of, abstracts of papers given at annual meeting, 135
development of, in children; association with virus infections (Frick OL et al), 228
food, disodium cromoglycate and, 12 (Abst.)
house dust, dissociation of (Pauli G et al), 245
insect sting, NIH Consensus Development Conference on emergency treatment of, 77 (Special report)
miscellaneous, 4, 7, 11, 17, 21, 24 (Absts.)
ocular, and immunology (Friedlaender MH), 51
to penicillin unsuccessfully treated with haptenic inhibitor (benzyl-penicilloyl-N_2-formillysine; BPO-FLYS), 4 (Abst.)
Allergy(ies)—Cont'd
respiratory, to factory humidifier contaminant presenting as pyrexia of undetermined origin, 24 (Abst.)
respiratory, skin test reactivity, and serum IgE, relationship of, in community population sample (Brown WG et al), 328
Allograft, venous, development of cytotoxic antibodies after, 13 (Abst.)
American Academy of Allergy, abstracts of papers given at annual meeting, 135
Anaphylactic-like reactions and contrast agents (Gorevic P, Kaplan AP), 225 (Editorial)
Anaphylactic reactions to muscle relaxants under general anesthesia (Vervloet D et al), 348
to shellfish, exercise-induced (Maulitz RM et al), 433
sensitization and atopy, relationship of; bee sting allergy model, 4 (Abst.)
Anaphylaxis, rat reaginic passive cutaneous, inhibition of, 10 (Abst.)
reverse-type, passive cutaneous anaphylaxis, and intradermal histamine, effects of H1 and H2 receptor antagonism on response of monkey skin to (Hutchcroft BJ et al), 376
slow-reacting substance of, and prostaglandins (Parker CW), 1
to sunflower seed (Noyes JH et al), 242
Anesthesia, general, anaphylactic reactions to muscle relaxants under (Vervloet D et al), 348
Anesthetic hypersensitivity, local, approach to patient with history of; experience with 90 patients (deShazo RD, Nelson HS), 387
Animal model for cell-mediated immune responses to dermatophytes (Hunjan BS, Cronholm LS), 361
Announcements, 1, 70, 134, 223, 296, 370, 442
Antibody(ies), allergen-specific IgE and IgG, in pollen-allergic children given immunotherapy for 2 to 6 years, 6 (Abst.)
to bee venom constituents in relation to exposure and clinical reaction to bee stings, IgE and hemagglutinating; Hymenoptera sting hypersensitivity, 6 (Abst.)
cytotoxic, development of, after venous allograft, 13 (Abst.)
tetanus and diphtheria IgE, comparison of, in allergic and nonallergic children; IgE synthesis in man (Nagel JE et al), 308
Antigen(s), cockroach and house dust, skin hypersensitivity to, comparative study of prevalence of, 17 (Abst.)
E content of pollen from individual plants of short ragweed (*Ambrosia artemisiifolia*) (Lee YS et al), 336
environmental, comparative serological and clinical findings in subjects exposed to, 17 (Abst.)
-induced bronchospasm, effect of vitamin C on (Kordansky DW et al), 61
polymerized ragweed, immune response of patients with ragweed hay fever treated with (Zeiss CR et al), 273
ragweed from different sources, lymphocyte responses to, (Ownby DR, Buckley RH), 65 (Brief communication)
replies to Ownby and Buckley (Geha RS), 67; (Ishizaka K), 68; (King TP), 67; (Mathews KP), 67; (Rocklin RE), 68 (Correspondence)
soluble, delayed hypersensitivity in mice, to; analysis in vivo, 12 (Abst.)

January, pp. 1-70; February, pp. 71-134; March, pp. 135-224; April, pp. 225-296; May, pp. 297-370; June, pp. 371-454.
Abstracts: January, pp. 1-4; February, pp. 5-8; March, pp. 9-14; April, pp. 15-18; May, pp. 19-22; June, pp. 23-26.

Antigenicity of infant formulas; role of immature intestine on protein permeability, 3 (Abst.)
Antihistamine(s), combined H1 and H2, treatment of chronic idiopathic urticaria with, 2 (Abst.)
H1 and H2, histamine, and immediate hypersensitivity reactions (Plaut M), 371 (Editorial)
Aspirin-sensitive asthma and tartrazine, interrelationship between (Gerber JG et al), 289
Asthma, allergen-induced, effect of Sch 1000 in, 15 (Abst.)
allergic bronchial, plasma concentrations in, 1 (Abst.)
allergic, cockroach cause of (Kang B et al), 80
aspirin-sensitive, and tartrazine, interrelationship between (Gerber JG et al), 289
bronchial, clinical investigation of agents with prophylactic anti-allergic effects in, 5 (Abst.)
patients with, variations of blood eosinophils and eosinophil cationic protein in serum in; studies during inhalation challenge test, 19 (Abst.)
childhood, house dust mite sensitivity in, 18 (Abst.)
continuous infusion intravenous isoproterenol therapy of, fatal mycardial toxicity during (Kurland G et al), 407
and cystic fibrosis, bronchial hyperreactivity in, 9 (Abst.)
disease severity in, and numbers of beta adrenergic receptors in lymphocytes, relationship between (Brooks SM et al), 401
and hay fever, 1, 5, 9, 15, 19 (Absts.)
occupational, nonspecific bronchial reactivity in (Lam S et al), 28
papain-induced; diagnosis by skin test, radioallergosorbent test (RAST), and bronchial provocation test, 20 (Abst.)
physiological and immunological features (Novey HS et al), 98
in teenage and young adult patients, pneumomediastinum as complication of (Dattwyler RJ et al), 412
Asthmatic(s) adults, cardiorespiratory adjustments of, to exercise, assessment of (Chryssanthopoulos C et al), 321
comparison of four weeks' treatment with fenoterol and terbutaline aerosols in (Trembath PW et al), 395
aerosolized terbutaline in (Weber RW et al), 116
children, dose-response characteristics of nebulized isoproterenol in (Posey WC, Tinkelman DG), 258
children, steroid-requiring, posterior subcapsular cataracts in (Rooklin AR et al), 383
patients, requests for as-needed medications by (Dahlem NW et al), 23
response to methacholine and exercise, comparison of (Eggleston PA), 104
Atopic dermatitis, levamisole therapy in; randomized double-blind evaluation, 20 (Abst.)
serum IgE in, 2 (Abst.)
use of levamisole in; prospective study, 15 (Abst.)
Atopy and anaphylactic sensitization, relationship of; bee sting allergy model, 4 (Abst.)
cystic fibrosis, and airways lability, 22 (Abst.)

B

Basophil(s) chemotaxis under agarose; variability among guinea pig donors and response to sera of different species (Anuras JS et al), 122
histamine release measurements, skin tests, inhalation tests, and specific IgE, comparison between; dissociation of house dust allergies (Pauli G et al), 245
leukocyte histamine, and tissue histamine, early effects of corticosteroids on (Dunsky EH et al), 426
Bee sting allergy model, relationship of atopy and anaphylactic sensitization, 4 (Abst.)
venom constituents, IgE and hemagglutinating antibodies to, in relation to exposure and clinical reaction to bee stings; Hymenoptera sting hypersensitivity, 6 (Abst.)
Beryllium, transfer of contact sensitivity to, using dialyzable leukocyte extracts (transfer factor) (Epstein WL, Byers VS), 111
Beta adrenergic agents—how much is enough? (Jenne JW), 74 (Editorial)
receptors, decreased, on polymorphonuclear leukocytes after adrenergic therapy, 11 (Abst.)
in lymphocytes, numbers of, and disease severity in asthma, relationship between (Brooks SM et al), 401
Biochemical and immunologic evaluation of potency of whole insect body extracts (Wypych JI et al), 267
Blood eosinophils and eosinophil cationic protein in serum in patients with bronchial asthma, variations in; studies during inhalation challenge test, 19 (Abst.)
Bone marrow origin of hepatic macrophages (Kupffer's cells) in humans, 26 (Abst.)
Breathing, intermittent, positive-pressure, 1 (Abst.)
Bronchial asthma, allergic, plasma prostaglandin concentrations in, 1 (Abst.)
clinical investigation of agents with prophylactic anti-allergic effects in, 5 (Abst.)
patients with, variations of blood eosinophils and eosinophil cationic protein in serum in; studies during inhalation challenge test, 19 (Abst.)
hyperreactivity in cystic fibrosis and asthma, 9 (Abst.)
provocation test, skin test, and radioallergosorbent test (RAST), diagnosis by; papain-induced asthma, 20 (Abst.)
reactivity, nonspecific, in occupational asthma (Lam S et al), 28
responsiveness to inhaled histamine and exercise (Anderton RC et al), 315
Bronchodilator effects of carbuterol and ephedrine, comparative study of, 22 (Abst.)
Bronchospasm, antigen-induced, effect of vitamin C on (Kordansky DW et al), 61

C

Calcium entrapped with phospholipid vesicles, secretion in mast cells induced by, 25 (Abst.)
Carbuterol and ephedrine, bronchodilator effects of, comparative study of, 22 (Abst.)
Cardiorespiratory adjustments of asthmatic adults to exercise, assessment of (Chryssanthopoulos C et al), 321
Cataracts, posterior subcapsular, in steroid-requiring asthmatic children (Rooklin AR et al), 383
Catechol-O-methyltransferase; thermolabile enzyme in erythrocytes of subjects homozygous for allele for low activity, 18 (Abst.)
Cell(s), mast, secretion in, induced by calcium entrapped with phospholipid vesicles, 25 (Abst.)
-mediated immune responses to dermatophytes, animal model for (Hunjan BS, Cronholm LS), 361
Cellular immunity with transfer factor, transfer of (Kirkpatrick CH), 71 (Editorial)
Chagas' disease, serum IgE levels in, 13 (Abst.)
Chemotactic factor, polymorphonuclear-neutrophil derived eosinophil, inactivation of, by human serum, 2 (Abst.)
Chemotaxis, basophil, under agarose; variability among guinea pig donors and response to sera of different species (Anuras JS et al), 122
Childhood asthma, house duse mite sensitivity in, 18 (Abst.)
idiopathic thrombocytopenic purpura, platelet-association immunoglobulin G in, 24 (Abst.)
and infancy, IgG subclass levels in, 23 (Abst.)
Children, asthmatic, dose-response characteristics of nebulized isoproterenol in (Posey WC, Tinkelman DG), 258
development of allergy in; association with virus infections (Frick OL et al), 228
Cholinergic urticaria, cold and, evaluation of patient with (Sigler RW et al), 35
Circadian variation in immune response in man, 23 (Abst.)

Circulating immune complexes during immunotherapy (Yang WH et al), 300
and practicing allergist (Kohler PF), 297 (Editorial)
Clinical and serological findings, comparative, in subjects exposed to environmental antigens, 17 (Abst.)
Cockroach cause of allergic asthma (Kang B et al), 80
and house dust antigens, skin hypersensitivity to, comparative study of prevalence of, 17 (Abst.)
Cold and cholinergic urticaria, evaluation of patient with (Sigler RW et al), 35
Complement, histamine, and fibrin split products, measurement of, and correlation with clinical parameters; radiographic contrast media infusions (Simon RA et al), 281
system, activation of, by radiographic contrast media; studies in vivo and in vitro (Arroyave CM et al), 276
Contact sensitivity to beryllium using dialyzable leukocyte extracts (transfer factor), transfer of (Epstein WL, Byers VS), 111
Contrast agents and anaphylactic-like reactions (Gorevic P, Kaplan AP), 225 (Editorial)
media infusions, radiographic (Simon RA et al), 281
radiographic, activation of complement system by; studies in vivo and in vitro (Arroyave CM et al), 276
prednisone-diphenhydramine regimen prior to use of, 295 (Correspondence)
Correspondence, 67, 295
Corticosteroid(s), early effects of, on basophils, leukocyte histamine, and tissue histamine (Dunsky EH et al), 426
regimens, prescribed oral, and length of hospitalization, relationships of requests for as-needed medications by asthmatic patients to (Dahlem NW et al), 23
Cutaneous anaphylaxis, passive, intradermal histamine, and reverse-type anaphylaxis, effects of H1 and H2 receptor antagonism on response of monkey skin to (Hutchcroft BJ et al), 376
Cyclic adenosine monophosphate (cAMP)–dependent events in lymphocytes, lithium, 25 (Abst.)
Cystic fibrosis and asthma, bronchial hyperreactivity in, 9 (Abst.)
atopy, and airways lability, 22 (Abst.)
Cytotoxic antibodies, development of, after venous allograft, 13 (Abst.)

D

Dermatitis, atopic, levamisole therapy in; randomized double-blind evaluation, 20 (Abst.)
serum IgE in, 2 (Abst.)
use of levamisole in; prospective study, 15 (Abst.)
Dermatology, 2, 7, 15, 20 (Absts.)
Dermatophytes, cell-mediated immune responses to, animal model for (Hunjan BS, Cronholm LS), 361
Diabetic children during acute ketoacidosis, abnormalities of in vitro lymphocyte response to mitogens in, 10 (Abst.)
Diagnosis of food sensitivity, appraisal of skin tests with food extracts for, 21 (Abst.)
Dilution and preservatives, effect of, on deterioration of Russian thistle *(Salsola pestifer)*, pollen extract (Nelson HS), 417
Diphtheria and tetanus IgE antibody, comparison of, in allergic and nonallergic children; IgE synthesis in man (Nagel JE et al), 308
Disease, adjuvant, activation in; significance of neutrophil activation in reactional lepromatous leprosy; effects of thalidomide in vivo and in vitro, 13 (Abst.)
severity in asthma and numbers of beta adrenergic receptors in lymphocytes, relationship between (Brooks SM et al), 401
Disodium cromoglycate and food allergy, 12 (Abst.)
Dose of beta adrenergic agents—how much is enough? (Jenne JW), 74 (Editorial)
-response characteristics of nebulized isoproterenol in asthmatic children (Posey WC, Tinkelman DG), 258
Drug eruptions, fixed, to tetracyclines, 16 (Abst.)

E

Emergency treatment of insect sting allergy, NIH Consensus Development Conference on, 77 (Special report)
Enzyme deficiency of ecto-5′-nucleotidase on cell surface, 26 (Abst.)
thermolabile, in erythrocytes of subjects homozygous for allele for low activity; catechol-O-methyltransferase, 18 (Abst.)
Eosinophil(s), blood, and eosinophil cationic protein in serum in patients with bronchial asthma, variations in; studies during inhalation challenge test, 19 (Abst.)
chemotactic factor, inactivation of polymorphonuclear-neutrophil derived, by human serum, 2 (Abst.)
Eosinophilic cationic protein, content of, in eosinophil leukocytes, 11 (Abst.)
Ephedrine and carbuterol, bronchodilator effects of, comparative study of, 22 (Abst.)
Eruptions, fixed drug, to tetracyclines, 16 (Abst.)
Exercise associated with cold and cholinergic urticaria (Sigler RW et al), 35
cardiorespiratory adjustments of asthmatic adults to, assessment of (Chryssanthopoulos C et al), 321
-induced anaphylactic reaction to shellfish (Maulitz RM et al), 433
and inhaled histamine, bronchial responsiveness to (Anderton RC et al), 315
and methacholine, comparison of asthmatic response to (Eggleston PA), 104
Exocytosis of histamine granules from mast cells, calcium as mediator of, 25 (Abst.)

F

Fenoterol and terbutaline aerosols, comparison of four weeks' treatment with, in adult asthmatics (Trembath PW et al), 395
Fibrin split products, histamine, and complement, measurement of, and correlation with clinical parameters; radiographic contrast media infusions (Simon RA et al), 281
Flunisolide; new intranasal steroid for treatment of allergic rhinitis, 19 (Abst.)
and placebo, double-blind trial comparing, for treatment of perennial rhinitis, 14 (Abst.)
Food allergens, allergic reactions caused by, effect of orally administered sodium cromoglycate on, 8 (Abst.)
allergy, disodium cromoglycate and, 12 (Abst.)
sensitivity, appraisal of skin tests with food extracts for diagnosis of, 21 (Abst.)

G

Granulocytes, neutrophilic, activation of, by products of human lymphocytes, 21 (Abst.)

H

Haptenic inhibitor (benzyl-penicilloyl-N_2-formillysine; BPO-FLYS, allergy to penicillin unsuccessfully treated with, 4 (Abst.)
Hay fever and asthma, 1, 5, 9, 15, 19 (Absts.)
ragweed, immune response of patients with, treated with polymerized ragweed antigens (Zeiss CR et al), 273
Helium-oxygen, response to inhalation of; large airway constriction in allergic rhinitis (Fairshter RD et al), 39
Hepatic macrophages (Kupffer's cells) in humans, bone marrow origin of, 26 (Abst.)
Hepatitis type B, acute viral, urticaria associated with, 7 (Abst.)
Histamine, complement, and fibrin split products, measurement of, and correlation with clinical parameters; radiographic contrast media infusions (Simon RA et al), 281
granules, exocytosis of, from mast cells, calcium as mediator of, 25 (Abst.)

H1 and H2 antihistamines, and immediate hypersensitivity reactions (Plaut M), 371 (Editorial)
inhaled, and exercise, bronchial responsiveness to (Anderton RC et al), 315
intradermal, reverse-type anaphylaxis, and passive cutaneous anaphylaxis, effects of H1 and H2 receptor antagonism on response of monkey skin to (Hutchcroft BJ et al), 376
leukocyte, tissue histamine, and basophils, early effects of corticosteroids on (Dunsky EH et al), 426
Homozygous subjects, for allele for low activity, thermolabile enzyme in erythrocytes of; catechol-O-methyltransferase, 18 (Abst.)
Honeybee sting sensitivity, rush venom immunotherapy program for (Yunginger JW et al), 340
House dust allergies, dissociation of (Pauli G et al), 245
and cockroach antigens, skin hypersensitivity to, comparative study of prevalence of, 17 (Abst.)
mite sensitivity in childhood asthma, 18 (Abst.)
Humidifier contaminant, factory, respiratory allergy to, presenting as pyrexia of undertermined origin, 24 (Abst.)
Hydroxyzine, daily, suppression of seasonal allergic rhinitis symptoms with (Schaaf L et al), 129
Hymenoptera sting hypersensitivity; IgE and hemagglutinating antibodies to bee venom constituents in relation to exposure and clinical reaction to bee stings, 6 (Abst.)
Hypersensitivity, delayed, in mice to soluble antigens; analysis in vivo, 12 (Abst.)
local anesthetic, approach to patient with history of; experiments with 90 patients (deShazo RD, Nelson HS), 387
reactions, immediate, histamine, and H1 and H2 antihistamines (Plaut M), 371 (Editorial)

I

Immune complexes, circulating, during immunotherapy (Yang WH et al), 300
and practicing allergist (Kohler PF), 297 (Editorial)
to dermatophytes, cell-mediated, animal model for (Hunjan BS, Cronholm LS), 361
in man, circadian variation in, 23 (Abst.)
of patients with ragweed hay fever treated with polymerized ragweed antigens (Zeiss CR et al), 273
Immunity, cell-mediated, in measles using leukocyte migration test, 7 (Abst.)
cellular, transfer of, with transfer factor (Kirkpatrick CH), 71 (Editorial)
Immunoglobulin E and hemagglutinating antibodies to bee venom constituents in relation to exposure and clinical reaction to bee stings; Hymenoptera sting hypersensitivity, 6 (Abst.)
and IgG antibodies, allergen-specific, in pollen-allergic children given immunotherapy for 2 to 6 years, 6 (Abst.)
irrelevant, assessment of influence of, on allergic sensitivity to two independent allergens (Schellenberg RR, Adkinson NF Jr), 15
levels and viral infections, 16 (Abst.)
in man; comparison of tetanus and diphtheria IgE antibody in allergic and nonallergic children (Nagel JE et al), 308
serum, in atopic dermatitis, 2 (Abst.)
serum levels, in Chagas' disease, 13 (Abst.)
serum, respiratory allergy, and skin test reactivity, relationship of, in community population sample (Brown WG et al), 328
specific, basophil histamine release measurements, skin tests, and inhalation tests, comparison between; dissociation of house dust allergies (Pauli G et al), 245
G, platelet-associated, in childhood idiopathic thrombocytopenic purpura, 24 (Abst.)
subclass levels in infancy and childhood, 23 (Abst.)
Immunologic(al) and biochemical evaluation of potency of whole insect body extracts (Wypych JI et al), 267
and physiological features; papain-induced asthma (Novey HS et al), 98
study of patients with acute hepatitis B with urticaria, 7 (Abst.)
Immunology, 2, 6, 12, 16, 21, 23 (Absts.)
and ocular allergy (Friedlaender MH), 51
Immunotherapy, circulating immune complexes during (Yang WH et al), 300
effects of, on allergen-specific IgE and IgG antibodies in pollen-allergic children, 6 (Abst.)
program, rush venom, for honeybee sting sensitivity (Yunginger JW et al), 340
Infancy and childhood, IgG subclass levels in, 23 (Abst.)
Infant formulas, antigenicity of; role of immature intestine on protein permeability, 3 (Abst.)
Infections, viral, and IgE levels, 16 (Abst.)
association with; development of allergy in children (Frick OL et al), 228
Inhalation challenge test, studies during; variations of blood eosinophils and eosinophil cationic protein in serum in patients with bronchial asthma, 19 (Abst.)
of helium-oxygen, response to; large airway constriction in allergic rhinitis (Fairshter RD et al), 39
Inhibitors, nonspecific, induced by soluble products of activated human lymphocytes, 14 (Abst.)
Insect body extracts, whole, immunologic and biochemical evaluation of potency of (Wypych JI et al), 267
sting allergy, NIH Consensus Development Conference on emergency treatment of, 77 (Special report)
Interferon; inducer of macrophage activation by polyanions, 24 (Abst.)
Intestine, immature, role of, on protein permeability; antigenicity of infant formulas, 3 (Abst.)
Intradermal histamine, reverse-type anaphylaxis, and passive cutaneous anaphylaxis, effects of H1 and H2 receptor antagonism on response of monkey skin to (Hutchcroft BJ et al), 376
Isoproterenol, nebulized, dose-response characteristics of, in asthmatic children (Posey WC, Tinkelman DG), 258
therapy, continuous infusion intravenous, of asthma, fatal myocardial toxicity during (Kurland G et al), 407

K

Ketoacidosis, acute, abnormalities of in vitro lymphocyte response to mitogens in diabetic children during, 10 (Abst.)
Kupffer's cells (hepatic macrophages) in humans, bone marrow origin of, 26 (Abst.)

L

Leprosy, reactional lepromatous, significance of neutrophil activation in; effect of thalidomide in vivo and in vitro; activation in adjuvant disease, 13 (Abst.)
Leukocyte(s), eosinophil, content of eosinophil cationic protein in, 11 (Abst.)
extracts, dialyzable (transfer factor), transfer of contact sensitivity to beryllium using (Epstein WL, Byers VS), 111
histamine, tissue histamine, and basophils, early effects of corticosteroids on (Dunsky EH et al), 426
migration test, cell-mediated immunity in measles using, 7 (Abst.)
polymorphonuclear, after adrenergic therapy, decreased beta-adrenergic receptors on, 11 (Abst.)
Levamisole therapy in atopic dermatitis; randomized double-blind evaluation, 20 (Abst.)
use of, in atopic dermatitis; prospective study, 15 (Abst.)
Light, visible, photoallergic urticaria induced by; additional cases and further studies, 11 (Abst.)
Lithium; modulator of cyclic adenosine monophosphate (cAMP)-dependent events in lymphocytes? 25 (Abst.)

Lymphocyte(s), activated human, nonspecific inhibitors induced by soluble products of, 14 (Abst.)
cyclic adenosine monophosphate (cAMP)–dependent events in, modulator of; lithium, 25 (Abst.)
ecto-5′-nucleotidase deficiency in agammaglobulinemia, 26 (Abst.)
products of, activation of neutrophilic granulocytes by, 21 (Abst.)
rosette formation of, with pig red blood cells, studies on, 16 (Abst.)
T and B, in vitro radiosensitivity of, evaluated using lymphocyte transformation tests and rosette formation tests, 3 (Abst.)
numbers of beta adrenergic receptors in, and disease severity in asthma, relationship between (Brooks SM et al), 401
response(s) to ragweed antigens from different sources (Ownby DR, Buckley RH), 65 (Brief communication)
replies to Ownby and Buckley (Geha RS), 67; (Ishizaka K), 68; (King TP), 67; (Mathews KP), 67; (Rocklin RE), 68 (Correspondence)
in vitro, abnormalities of, to mitogens in diabetic children during acute ketoacidosis, 10 (Abst.)

M

Macrophage(s) activation, inducer of, by polyanions; interferon, 24 (Abst.)
, hepatic (Kupffer's cells) in humans, bone marrow origin of, 26 (Abst.)
-mediated host defense, how tumors may resist; tumor surveillance, 21 (Abst.)
Mast cells, secretion in, induced by calcium entrapped with phospholipid vesicles, 25 (Abst.)
Measles, cell-mediated immunity in, using leukocyte migration test, 7 (Abst.)
Medications, as-needed, by asthmatic patients, requests for (Dahlem NW et al), 23
Methacholine challenge, nasal (Borum P), 253
and exercise, comparison of asthmatic response to (Eggleston PA), 104
Mitogens in diabetic children during acute ketoacidosis, abnormalities of in vitro lymphocyte response to, 10 (Abst.)
Molecular weight, high, ragweed polymers, reduced allergenicity of (Patterson R et al), 47
Monocyte function and tumor surveillance, 21 (Abst.)
Mouse allergens, characterization of (Siraganian RP, Sandberg AL), 435
Muscle relaxants, anaphylactic reactions to, under general anesthesia (Vervloet D et al), 348
Myocardial toxicity, fatal, during continuous infusion intravenous isoproterenol therapy of asthma (Kurland G et al), 407

N

Nasal methacholine challenge (Borum P), 253
reactivity, measurement of, in nasal methacholine challenge (Borum P), 253
spray steroid, new, for treatment of allergic rhinitis; flunisolide, 19 (Abst.)
Nebulized isoproterenol, dose-response characteristics of, in asthmatic children (Posey WC, Tinkelman DG), 258
Neutrophil activation, significance of, in reactional lepromatous leprosy; effects of thalidomide in vivo and in vitro; activation in adjuvant disease, 13 (Abst.)
Neutrophilic granulocytes, activation of, by products of human lymphocytes, 21 (Abst.)
Nitrogen unit, protein, precipitation procedure, for allergenic extracts, optimization of parameters in (May JC et al), 87

O

Occupational asthma, nonspecific bronchial reactivity in (Lam S et al), 28
Ocular allergy and immunology (Friedlaender MH), 51
Otolaryngology, otorhinology and, 14 (Absts.)
Otorhinology and otolaryngology, 14 (Absts.)

P

Papain induced allergic reactions, 7 (Abst.)
asthma; diagnosis by skin test, radioallergosorbent test (RAST), and bronchial provocation test, 20 (Abst.)
physiological and immunological features (Novey HS et al), 98
Passive cutaneous anaphylaxis, intradermal histamine, and reverse-type anaphylaxis, effects of H1 and H2 receptor antagonism on response of monkey skin to (Hutchcroft BJ et al), 376
rat reaginic, inhibition of, 10 (Abst.)
Pathology, pharmacology, and physiology, 10, 18, 22, 25 (Absts.)
Pediatrics, 3, 6, 10, 18, 22, 24 (Absts.)
Penicillin, allergy to, unsuccessfully treated with haptenic inhibitor (benzyl-penicilloyl-N_2-formillysine; BPO-FLYS), 4 (Abst.)
Pharmacology, physiology, and pathology, 10, 18, 22, 25 (Absts.)
Phospholipid vesicles, calcium entrapped with, secretion in mast cells induced by, 25 (Abst.)
Photoallergic urticaria induced by visible light; additional cases and further studies, 11 (Abst.)
Physiological and immunological features; papain-induced asthma (Novey HS et al), 98
Physiology, pathology, and pharmacology, 10, 18, 22, 25 (Absts.)
Platelet-associated immunoglobulin G in childhood idiopathic thrombocytopenic purpura, 24 (Abst.)
Pneumomediastinum as complication of asthma in teenage and young adult patients (Dattwyler RJ et al), 412
Pollen, antigen E content of, from individual plants of short ragweed *(Ambrosia artemisiifolia)* (Lee YS et al), 336
extract, Russian thistle *(Salsola pestifer)*, effect of preservatives and dilution on deterioration of (Nelson HS), 417
Polyanions, inducer of macrophage activation by; interferon, 24 (Abst.)
Polymerized ragweed antigens, immune response of patients with ragweed hay fever treated with (Zeiss CR et al), 273
Polymers, ragweed, high molecular weight, reduced allergenicity of (Patterson R et al), 47
Polymorphonuclear leukocytes after adrenergic therapy, decreased beta-adrenergic receptors on, 11 (Abst.)
Positive-pressure breathing, intermittent, 1 (Abst.)
Potency of allergen extracts, new method of standardization (Akiyama K, Miyamoto T, Horiuchi Y), 354
Prednisone-diphenhydramine regimen prior to use of radiographic contrast media, 295 (Correspondence)
Preservatives and dilution, effect of, on deterioration of Russian thistle *(Salsola pestifer)*, pollen extract (Nelson HS), 417
Prophylactic anti-allergic effects in bronchial asthma, clinical investigation of agents with, 5 (Abst.)
Prostaglandin(s), plasma, concentrations in allergic bronchial asthma, 1 (Abst.)
and slow-reacting substance (Parker CW), 1
system, tartrazine and (Gerber JG et al), 289
Protein, eosinophilic cationic, content of, in eosinophil leukocytes, 11 (Abst.)
nitrogen unit precipitation procedure for allergenic extracts, optimization of parameters in (May JC et al), 87
permeability, role of immature intestine on; antigenicity of infant formulas, 3 (Abst.)
Purified protein derivative (PPD), intradermal injection of, circadian effect on response to, 22 (Abst.)
Pyrexia of undetermined origin, respiratory allergy to factory humidifier contaminant presenting as, 24 (Abst.)

R

Radioallergosorbent test (RAST), bronchial provocation test, and skin test, diagnosis by; papain-induced asthma, 20 (Abst.)
Radiographic contrast media, activation of complement system by; studies in vivo and in vitro (Arroyave CM et al), 276
anaphylactic-like reactions in patients undergoing, (Gorevic P, Kaplan AP), 225 (Editorial)
infusions (Simon RA et al), 281
prednisone-diphenhydramine regimens prior to use of, 295 (Correspondence)
Radiosensitivity, in vitro, of human T and B lymphocytes, evaluated using lymphocyte transformation tests and rosette formation tests, 3 (Abst.)
Ragweed antigens from different sources, lymphocyte responses to (Ownby DR, Buckley RH), 65 (Brief communication)
replies to Ownby and Buckley (Geha RS), 67; (Ishizaka K), 68; (King TP), 67; (Mathews KP), 67; (Rocklin RE), 68 (Correspondence)
hay fever, immune response of patients with, treated with polymerized ragweed antigens (Zeiss CR et al), 273
polymers, high molecular weight, reduced allergenicity of (Patterson R et al), 47
short (*Ambrosia artemisiifolia*), antigen E content of pollen from individual plants of (Lee YS et al), 336
Reactional lepromatous leprosy, significance of neutrophil activation in; effects of thalidomide in vivo and in vitro; activation in adjuvant disease, 13 (Abst.)
Reactivity to soluble antigens in mice, 12 (Abst.)
Reaginic passive cutaneous anaphylaxis, rat, inhibition of, 10 (Abst.)
Receptor antagonism, H1 and H2, effects of, on response of monkey skin to intradermal histamine, reverse-type anaphylaxis, and passive cutaneous anaphylaxis (Hutchcroft BJ et al), 376
Relaxants muscle, anaphylactic reactions to, under general anesthesia (Vervloet D et al), 348
Respiratory allergy to factory humidifier contaminant presenting as pyrexia of undetermined origin, 24 (Abst.)
skin test reactivity, and serum IgE, relationship of, in community population sample (Brown WG et al), 328
Rhinitis, allergic, large airway constriction in; response to inhalation of helium-oxygen (Fairshter RD et al), 39
new intranasal steroid for treatment of; flunisolide, 19 (Abst.)
perennial, double-blind trial comparing flunisolide and placebo for treatment of, 14 (Abst.)
symptoms, seasonal allergic, suppression of, with daily hydroxyzine (Schaaf L et al), 129
Rosette formation of human lymphocytes with pig red blood cells, studies on, 16 (Abst.)
Rush venom immunotherapy program for honeybee sting sensitivity (Yunginger JW et al), 340

S

Sch 1000 in allergen-induced asthma, effect of, 15 (Abst.)
Seed, sunflower, anaphylaxis to (Noyes JH et al), 242
Sensitivity, allergic, to two independent allergens, assessment of influence of irrelevant IgE on (Schellenberg RR, Adkinson NF Jr), 15
Sera of different species, variability among guinea pig donors and response to; basophil chemotaxis under agarose (Anuras JS et al), 122
Serological and clinical findings, comparative, in subjects exposed to environmental antigens, 17 (Abst.)
Serum eosinophil cationic protein in, variations of blood eosinophils and, in patients with bronchial asthma; studies during inhalation challenge test, 19 (Abst.)
human, inactivation of polymorphonuclear-neutrophil derived eosinophil chemotactic factor by, 2 (Abst.)
IgE levels in Chagas' disease, 13 (Abst.)
Serum IgE—Cont'd
respiratory allergy, and skin test reactivity, relationship of, in community population sample (Brown WG et al), 328
mouse, characterization of allergens in (Siraganian RP, Sandberg AL), 435
Shellfish, exercise-induced anaphylactic reaction to (Maulitz RM et al), 433
Skin hypersensitivity to cockroach and house dust antigens, comparative study of prevalence of, 17 (Abst.)
mouse, characterization of allergens in (Siraganian RP, Sandberg AL), 435
test(s) with food extracts for diagnosis of food sensitivity, appraisal of, 21 (Abst.)
radioallergosorbent test (RAST), and bronchial provocation test, diagnosis by; papain-induced asthma, 20 (Abst.)
reactivity, serum IgE, and respiratory allergy, relationship of, in community population sample (Brown WG et al), 328
Slow-reacting substance and prostaglandins (Parker CW), 1
Sodium cromoglycate, orally administered, effect of, on allergic reactions caused by food allergens, 8 (Abst.)
Standardization of potency of allergen extracts, new method of (Akiyama K, Miyamoto T, Horiuchi Y), 354
Steroid, intranasal, new, for treatment of allergic rhinitis; flunisolide, 19 (Abst.)
-requiring asthmatic children, posterior subcapsular cataracts in (Rooklin AR et al), 383
Sting, allergy, insect, NIH Consensus Development Conference on emergency treatment of, 77 (Special report)
bee, allergy model; relationship of atopy and anaphylactic sensitization, 4 (Abst.)
hypersensitivity, Hymenoptera; IgE and hemagglutinating antibodies to bee venom constituents in relation to exposure and clinical reaction to bee stings, 6 (Abst.)
sensitivity, honeybee, rush venom immunotherapy program for (Yunginger JW et al), 340
Sunflower seed, anaphylaxis to (Noyes JH et al), 242

T

T cells, rosette-forming, 16 (Abst.)
Tartrazine and prostaglandin system (Gerber JG et al), 289
Teenage and young adult patients, asthma in, pneumomediastinum as complication of (Dattwyler RJ et al), 412
Terbutaline, aerosolized, in asthmatics (Weber RW et al), 116
and fenoterol aerosols, comparison of four weeks' treatment with, in adult asthmatics (Trembath PW et al), 395
Test(s), leukocyte migration, cell-mediated immunity in measles using, 7 (Abst.)
lymphocyte transformation and rosette formation, in vitro radiosensitivity of human T and B lymphocytes evaluated using, 3 (Abst.)
skin and inhalation, specific IgE, and basophil histamine release measurements, comparison between; dissociation of house dust allergies (Pauli G et al), 245
Testing, skin, and progressive challenge, use of, to detect local anesthetic hypersensitivity (deShazo RD, Nelson HS), 387
Tetanus and diphtheria IgE antibody, comparison of, in allergic and nonallergic children; IgE synthesis in man (Nagel JE et al), 308
Tetracyclines, fixed drug eruptions to, 16 (Abst.)
Thalidomide, effects of, in vivo and in vitro; significance of neutrophil activation in reactional lepromatous leprosy; activation in adjuvant disease, 13 (Abst.)
Theophylline, oral, absorption of, relation of production formulation to, 10 (Abst.)
Thrombocytopenic purpura, childhood idiopathic, platelet-associated immunoglobulin G in, 24 (Abst.)
Toxicity, fatal myocardial, during continuous infusion intravenous isoproterenol therapy of asthma (Kurland G et al), 407

Transfer factor, transfer of celluler immunity with (Kirkpatrick CH), 71 (Editorial)
of contact sensitivity by (Epstein WL, Byers VS), 111
Tumor surveillance; how tumors may resist macrophage-mediated host defense, 21 (Abst.)

U

Urine, mouse, characterizetion of allergens in (Siraganian RP, Sandberg AL), 435
Urticaria associated with acute viral hepatitis type B, 7 (Abst.)
chronic idiopathic, treatment of, with combined H1 and H2 blockers, 2 (Abst.)
cold and cholinergic, evaluation of patient with (Sigler RW et al), 35
photoallergic, induced by visible light; additional cases and further studies, 11 (Abst.)

V

Venom constituents, bee, in relation to exposure and clinical reactions to bee stings, IgE and hemagglutinating antibodies to; Hymenoptera sting hypersensitivity, 6 (Abst.)
immunotherapy program, rush, for honeybee sting sensitivity (Yunginger JW et al), 340
Viral infections and IgE levels, 16 (Abst.)
association with; development of allergy in children (Frick OL et al), 228
Vitamin C, effect of, on antigen-induced bronchospasm (Kordansky DW et al), 61

Subject index

A

Academy of Allergy, American, activities of; advancement of knowledge and practice of allergy (Van Metre TE Jr), 235 (Presidential address)
historical review (Cohen SG), 332
introduction to (Dworetzky M), 331
Acetylcholine receptors of intact mammalian neuromuscular junctions, effect of myasthenic Ig on, 19 (Abst.)
Acknowledgment to reviewers, 475
Adherent cells, selective suppression by; prostaglandin and cyclic AMP analogues of blastogenesis induced by different mitogens, 16 (Abst.)
Afterthoughts; summing up; historical review of American Academy of Allergy (Cohen SG), 452
Agammaglobulinemia, lymphocyte ecto-5′-nucleotidase deficiency, 6 (Abst.)
Airway(s) hyperreactivity and hyperpermeability, relationship between, in *Ascaris*-sensitive monkeys (Boucher RC et al), 197
obstruction, reversible, value of atropine in documentation of, 1 (Abst.)
and parenchymal responses, comparison of; prostaglandin generation by human and guinea pig lung tissue (Steel L et al), 287
response to allergens and nonspecific bronchial reactivity, relationship between (Nathan RA et al), 491
to histamine, effect of histamine-1 and histamine-2 antagonists on, in rhesus monkey (Greenberger P et al), 189
Albuterol and isoproterenol in bronchial asthma, 9 (Abst.)
Allergen(s), airways response to, and nonspecific bronchial reactivity, relationship between (Nathan RA et al), 491
atopic, immunochemical properties of (King TP), 159 (Postgraduate course presentation)
cat dander, bronchial hyperreactivity in the bronchus obstruction after inhalation of, study on the significance of (Neijens HJ et al), 507
dog and cat, RAST in diagnosis of hypersensitivity to; comparison of different extract preparations with clinical history, skin test, and provocation tests, 8 (Abst.)
fungi as, in animal care units (Burge H et al), 29
immunotherapy, clinical efficacy of (Patterson R), 155 (Postgraduate course presentation)
modified, suppression of IgE antibodies with (Sehon AH, Lee WY), 242 (Postgraduate course presentation)
Allergenic and biologic activity of commercial preparations of house dust extract (Siraganian RP et al), 526
crossreactivity of subunits; structure and activity of ragweed AgE (Paull BR et al), 539
Allergenicity and lymphocyte-stimulating property of rice protein (Shibasaki M et al), 259
Allergic disease, human, suppressor T cells in (Geha RS), 477 (Editorial)
relevance of neutrophil chemotactic factors to (Wasserman SI, Center DM), 231 (Editorial)
and nonallergic beekeepers, comparison of atopic background between, 3 (Abst.)
reaction, acute, after composite pollen ingestion (Cohen SH et al), 270

Allergic—Cont'd
respiratory disease, drug-induced, 12 (Abst.)
responses, nasal, cutaneous, in ragweed hay fever; lack of clinical and histopathologic correlations with late phase reactions (Richerson HB et al), 67
Allergy(ies), advancement of knowledge and practice of (Van Metre TE Jr), 235 (Presidential address)
American Academy of, activities of; advancement of knowledge and practice of allergy (Van Metre TE Jr), 235 (Presidential address)
historical review (Cohen SG), 332
introduction to (Dworetzky M), 331
Association for Study of; historical review of American Academy of Allergy (Cohen SG), 333
and clinical immunology; fifty years from now (Samter M), 321
Journal of; fiftieth anniversary (Reed CE), 305
food, transient hypogammaglobulinemia, and elevated IgE levels (Fineman SM et al), 216
Foundation of America, Asthma and; historical review of American Academy of Allergy (Cohen SG), 399
heredity for, and type of feeding, T lymphocytes and blood eosinophils in early infancy in relation to (Juto P, Strannegård Ö), 38
to insects in Japan; reaginic sensitivity to silkworm moth in patients with bronchial asthma (Kino T, Oshima S), 131
state of the art (Lichtenstein LM et al), 5
sting (Reisman RE), 3 (Editorial)
Journal of; publications; historical review of American Academy of Allergy (Cohen SG), 362
miscellaneous, 3, 8, 10, 15 (Absts.)
new viewpoint on (Bullens SS), 472 (Presidential addresses)
respiratory, specific hyposensitization of, with new, tetrahydrofuran-treated semi-depot extract; two-year study of effects and side effects, 18 (Abst.)
societies, state, regional, and local, listing of presidents of, as of January, 1979, 228
state of (Black JH), 469 (Presidential addresses)
type I, passive transfer in man and monkey of, due to heat-labile and heat-stable antibody to complex salts of platinum, 3 (Abst.)
Allogeneic-marrow grafts, human recipients of, antileukemic effect of graft-versus-host disease in, 15 (Abst.)
Alopecia areata, patients with, immunological studies in, 1 (Abst.)
Amalgamation, Eastern, Western, and; historical review of American Academy of Allergy (Cohen SG), 353
American Association for Study of Allergy; historical review of American Academy of Allergy (Cohen SG), 333
Academy of Allergy; historical review (Cohen SG), 332
introduction to (Dworetzky M), 331
Anaphylactoid reactions to intravenous contrast material administration (Lieberman P, Siegle RL), 13
Anaphylaxis, 5 (Absts.)
passive cutaneous, inhibition of, by factor in normal rate serum; latency period of sensitization, 5 (Abst.)
Androgen, impeded (oxymetholone), therapy of hereditary angioedema, clinical and biochemical effects of (Sheffer AL et al), 275
Angioedema, hereditary, impeded androgen (oxymetholone) therapy of, clinical and biochemical effects of (Sheffer AL et al), 275
Animal care units, fungus exposure risks associated with (Burge H et al), 29
Anniversary, fiftieth; Journal of Allergy and Clinical Immunology (Reed CE), 305

July, pp. 1-78; August, pp. 79-154; September, pp. 155-230; October, pp. 231-304; November, pp. 305-474; December (Part 1), pp. 475-560; December (Part 2), pp. 561-692.

Abstracts: July, pp. 1-4; August, pp. 5-8; September, pp. 9-12; October, pp. 13-16; December (Part 1), pp. 17-22.

Announcements, 78, 153, 227, 303, 546
Antibody-dependent monocyte-mediated cytotoxicity in severe atopic dermatitis, 13 (Abst.)
Antibody(ies), IgE, stability of, 20 (Abst.)
suppression of, with modified allergens (Sehon AH, Lee WY), 242 (Postgraduate course presentation)
Antigen(s), bronchial inhalation challenge with (Spector S, Farr R), 580
and cholinergic or histamine inhalation challenge, indications for (Rosenthal RR et al), 603
E, ragweed, structure and activity of; allergenic crossreactivity of subunits (Paull BR et al), 539
Ganoderma, human sensitization to (Tarlo SM et al), 43
-independent migration inhibition factor, characterization of, in dialyzable leukocyte extracts (DLEs) as neutrophil immobilizing factor; effects of DLEs with transfer factor activity on leukocyte migration in vitro (Wilson GB et al), 56
–induced, ragweed, neutrophil chemotactic activity in man, further characterization and biologic activity of (Atkins PC et al), 251
and methacholine challenge in children with asthma (Chai H), 575
particulate, induction of hyporesponsiveness to, by feeding; sequence of immunologic response to fed antigen (David MF), 164
-specific desensitization of human basophils, 15 (Abst.)
Asbestos fibers, binding of immunoglobulin and activation of complement by (Hasselbacher P), 294
Ascorbic acid and transfer factor therapy, response to; hyperimmunoglobulin E syndrome, 6 (Abst.)
Aspirin, azo dyes, non-azo dyes, and preservatives, incidence of bronchoconstriction due to, in population of perennial asthmatics (Weber RW et al), 32
and concomitant idiosyncrasies in adult asthmatic patients (Spector SL et al), 500
and tartrazine idiosyncrasy, evaluation of (Farr RS et al), 667
Asthma and Allergy Foundation of America; historical review of American Academy of Allergy (Cohen SG), 399
and Allied Conditions, Society for Study of; historical review of American Academy of Allergy (Cohen SG), 342
bronchial, albuterol and isoproterenol in, 9 (Abst.)
patients with, reaginic sensitivity to silkworm moth in; allergy to insects in Japan (Kino T, Oshima S), 131
childhood, diurnal expiratory flow after inhalation of Freons and fenoterol in (Graff-Lonnevig V), 534
children with, antigen and methacholine challenge in (Chai H), 575
coffee worker's, bronchoprovocation studies in (Karr RM), 650
exercise-induced, evaluation of pharmacotherapy for (Anderson S et al), 612
laboratory evaluation of; methodologic considerations (Eggleston PA), 604
and hay fever, 1, 9, 13, 17 (Absts.)
life-threatening, comparison of salbutamol given intravenously and by intermittent positive-pressure breathing in, 21 (Abst.)
occupational, 646-666
epidemiologic and medical-legal aspects of (Weill H), 662
overview and mechanisms (Salvaggio JE), 646
study session on (Chester EH, Schwartz HJ), 665
physiologic effects of inhaled histamine in; reversible changes in pulmonary mechanics and total lung capacity (Bleecker ER et al), 597
and pregnancy, 17 (Abst.)
reversible airways obstruction in, value of atropine in documentation of, 1 (Abst.)
severe, and volatile diabetes mellitus in same patient; treatment dilemma (Tinkelman D, King S), 223 (Allergy grand rounds)
Asthma—Cont'd
toluene diisocyanate–induced, bronchoprovocation tests in, proposed standardized method for (Gerblich AA et al), 658
–mediated, and inhalation challenge testing (Butcher BT), 655
Asthmatic(s), anti-, drugs, oral, assessment of, by inhalation challenges (Falliers CJ), 685
attacks and P pulmonale in status asthmaticus (Gelb AF et al), 18
children, long-term treatment with beclomethasone dipropionate aerosol in, with special reference to growth, 21 (Abst.)
noncompliance in; study of theophylline levels in pediatric emergency room population, 18 (Abst.)
exercise challenge testing of, guidelines for methodology of (Eggleston PA et al), 642
and normal subjects, lymphocytes from, EAC3 rosette formation by, differential effects of pharmacologic agents on (Kohn BA et al), 182
patients, adult, aspirin and concomitant idiosyncrasies in (Spector SL et al), 500
reactivity characteristics to methacholine and histamine in (Spector SL, Kinsman RA), 587
perennial, population of, incidence of bronchoconstriction due to aspirin, azo dyes, non-azo dyes, and preservatives in (Weber RW et al), 32
Association for Study of Allergy, American; historical review of American Academy of Allergy (Cohen SG), 333
Atopic allergens, immunochemical properties of (King TP), 159 (Postgraduate course presentation)
background, comparison of, between allergic and nonallergic beekeepers, 3 (Abst.)
children, breast-fed, IgE to cow's-milk protein in (Kaplan MS, Solli NJ), 122
dermatitis associated with elevated IgE, suppressor cell function in (Schuster DL et al), 139
severe, antibody-dependent monocyte-mediated cytotoxicity in, 13 (Abst.)
families, IgE and IgG_4 subclass in, 2 (Abst.)
and nonatopic individuals, lymphocyte stimulation with phorbol myristate acetate in, 2 (Abst.)
subjects, nonspecific suppressor cell function in (Martinez JD et al), 485
Atropine, value of, in documentation of reversible airways obstruction, 1 (Abst.)
Awards and honors; historical review of American Academy of Allergy (Cohen SG), 440
Azo dyes, non-azo dyes, preservatives, and aspirin, incidence of bronchoconstriction due to, in population of perennial asthmatics (Weber RW et al), 32

B

Basophil(s) arrival and function in tissue hypersensitivity reactions (Askenase PW), 79 (Postgraduate course presentation: Mechanisms of hypersensitivity; cellular interactions)
human, antigen-specific desensitization of, 15 (Abst.)
leukocytes and mast cells in human nasal secretions and scrapings studied by light microscopy, 13 (Abst.)
and other human blood cells, cytotoxicity of ionophore A23187 for (Pruzansky JJ, Patterson R), 50
Beclomethasone dipropionate aerosol, long-term treatment with, in asthmatic children, with special reference to growth, 21 (Abst.)
Beekeepers, allergic and nonallergic, comparison of atopic background between, 3 (Abst.)
Beta$_2$ adrenergic agonist, selective, and theophylline, effect of, on skin test reactivity and cardiovascular parameters (Spector SL), 23

Biochemical and clinical effects of impeded androgen (oxymetholone) therapy of hereditary angioedema (Sheffer AL et al), 275
Biologic and allergenic activity of commercial preparations of house dust extract (Siraganian RP et al), 526
Blastogenesis, prostaglandin and cyclic AMP analogues of, induced by different mitogens; selective suppression by adherent cells, 16 (Abst.)
Blood cells, other human, and basophils, cytotoxicity of ionophore A23187 for (Pruzansky JJ, Patterson R), 50
eosinophils and T lymphocytes in early infancy in relation to heredity for allergy and type of feeding (Juto P, Strannegård O), 38
Bone marrow origin of hepatic macrophages (Kupffer's cells) in humans, 6 (Abst.)
Breast-fed atopic children, IgE to cow's-milk protein in (Kaplan MS, Solli NJ), 122
Bronchial asthma, albuterol and isoproterenol in, 9 (Abst.)
patients with, reaginic sensitivity to silkworm moth in; allergy to insects in Japan (Kino T, Oshima S), 131
hyperreactivity in the bronchus obstruction after inhalation of cat dander allergen, study on the significance of (Neijens HJ et al), 507
inhalation challenge with antigens (Spector S, Farr R), 580
reactivity, nonspecific, and airways response to allergens, relationship between (Nathan RA et al), 491
Bronchoconstriction, incidence of, due to aspirin, azo dyes, nonazo dyes, and preservatives in population of perennial asthmatics (Weber RW et al), 32
Bronchodilator drugs, evaluation of, and conduct of clinical trials, standards for (Rosenthal RR), 689
Bronchoprovocation; editorial (Rosenthal RR), 561 (Editorial)
emerging role of (Rosenthal RR), 564
exercise, test; standardization of procedures and evaluation of response (Cropp GJA), 627
introduction to proceedings of workshop on (Rosenthal RR), 563
studies in coffee worker's asthma (Karr RM), 650
testing, measurements of responsiveness in (Fish JE, Kelly JF), 592
tests in toluene diisocyanate–induced asthma, proposed standardized method for (Gerblich AA et al), 658
use of, in diagnosis of hypersensitivity pneumonitis (Fink JN), 590
Bronchospasm, exercise-induced, comparison of effectiveness of free-running and treadmill exercise for assessing, in clinical practice (Shapiro GG et al), 609
studies of, statistical considerations in (Johnson JD), 634

C

Candida killing, defective, in childhood malnutrition, 19 (Abst.)
Cardiovascular parameters and skin test reactivity, effect of selective beta$_2$ adrenergic agonist and theophylline on (Spector SL), 23
status and risk factors in exercise testing (Trautlein JJ), 625
Cat dander allergen, bronchial hyperreactivity in the bronchus obstruction after inhalation of, study on the significance of (Neijens HJ et al), 507
Causative factors of alopecia areata, 1 (Abst.)
C2 deficiency, hereditary, associated with common variable immunodeficiency, 19 (Abst.)
Cell, suppressor, nonspecific, function in atopic subjects (Martinez JD et al), 485
Cellular interactions; basophil arrival and function in tissue hypersensitivity reactions (Askenase PW), 79 (Postgraduate course presentation: Mechanisms of hypersensitivity; cellular interactions)
role of eosinophil (Kay AB), 90 (Postgraduate course presentation: Mechanisms of hypersensitivity, cellular interactions)
Certification and standards; historical review of American Academy of Allergy (Cohen SG), 375
Challenge, use of, for clinical trials, 675-692
introduction to (Herzig D), 675
Chemotactic activity, ragweed antigen–induced, in man, further characterization and biologic activity of (Atkins PC et al), 251
factors, neutrophil, relevance of, to allergic disease (Wasserman SI, Center DM), 231 (Editorial)
Chemotherapy for advanced Hodgkin's disease, immunological monitoring during, 20 (Abst.)
Childhood asthma, diurnal expiratory flow after inhalation of Freons and fenoterol in (Graff-Lonnevig V), 534
malnutrition, defective *Candida* killing in, 19 (Abst.)
Children, asthmatic, antigen and methacholine challenge in (Chai H), 575
long-term treatment with beclomethasone dipropionate aerosol in, with special reference to growth, 21 (Abst.)
noncompliance in; study of theophylline levels in pediatric emergency room population, 18 (Abst.)
breast-fed atopic, IgE to cow's-milk protein in (Kaplan MS, Solli NJ), 122
cystic fibrosis, parents of, IgE-mediated hypersensitivity to pancreatic extract in, 8 (Abst.)
Chlorpromazine-treated patients, immunologic and coagulation disorders in, 20 (Abst.)
Cholinergic or histamine and antigen inhalation challenge, indications for (Rosenthal RR et al), 603
Clinical and biochemical effects of impeded androgen (oxymetholone) therapy of hereditary angioedema (Sheffer AL et al), 275
efficacy of allergen immunotherapy (Patterson R), 155 (Postgraduate course presentation)
and immunological studies of venom immunotherapy, 10 (Abst.)
immunology and allergy; fifty years from now (Samter M), 321
Journal of; fiftieth anniversary (Reed CE), 305
trials and evaluation of bronchodilator drugs, standards for conduct of (Rosenthal RR), 689
use of challenge for, 675-692
introduction to (Herzig D), 675
Coagulation and immunologic disorders in chlorpromazine-treated patients, 20 (Abst.)
system, activation of, evidence for, in IgE-dependent reaction in man; late phase skin reaction, 7 (Abst.)
Coca and Cooke, irreverent recollections of, 1928-1978 (Chase MW), 306
Coffee worker's asthma, bronchoprovocation studies in (Karr RM), 650
Colostral leukocytes, human, interferon synthesis by, 4 (Abst.)
Commercial preparations of house dust extract, allergenic and biologic activity of (Siraganian RP et al), 526
Complement activation following intravenous contrast material administration (Lieberman P, Siegle RL), 13
and binding of immunoglobulin by asbestos fibers (Hasselbacher P), 294
changes and histamine release following injection of contrast media in humans (Cogen FC et al), 299
and contrast material reactors (Lasser EC et al), 105
Conjunctivitis, ragweed, seasonal, treatment in, topical ocular administration of cromolyn sodium for (Welsh PW et al), 209
Contaminants, nonvenom, in venom preparation, sensitization to (Reisman RE et al), 281
Contrast material administration, intravenous, complement activation following (Lieberman P, Siegle RL), 13
reactors and complement (Lasser EC et al), 105
media in humans, injection of, histamine release and complement changes following (Cogen FC et al), 299
Cooke and Coca, irreverent recollections of, 1928-1978 (Chase MW), 306
Correspondence, 546
Cow's-milk protein, IgE to, in breast-fed atopic children (Kaplan MS, Solli NJ), 122

Cromolyn sodium, topical ocular administration of, for treatment in seasonal ragweed conjunctivitis (Welsh PW et al), 209
Crossreactivity, allergenic, of subunits; structure and activity of ragweed AgE (Paull BR et al), 539
Cutaneous nasal allergic responses in ragweed hay fever; lack of clinical and histopathologic correlations with late phase reactions (Richerson HB et al), 67
Cyclic AMP and prostaglandin analogues of blastogenesis induced by different mitogens; selective suppression by adherent cells, 16 (Abst.)
Cystic fibrosis children, parents of, IgE-mediated hypersensitivity to pancreatic extract in, 8 (Abst.)
Cytotoxicity, antibody-dependent monocyte-mediated, in severe atopic dermatitis, 13 (Abst.)
of ionophore A23187 for basophils and other human blood cells (Pruzansky JJ, Patterson R), 50

D

Dander, cat, allergen, bronchial hyperreactivity in the bronchus obstruction after inhalation of, study on the significance of (Neijens HJ et al), 507
Depot, semi-, extract, tetrahydrofuran-treated, specific hyposensitization of respiratory allergies with; two-year study of effects and side effects, 18 (Abst.)
Dermatitis, atopic, associated with elevated IgE, suppressor cell function in (Schuster DL et al), 139
severe, antibody-dependent monocyte-mediated cytotoxicity in, 13 (Abst.)
seaweed; structure of lyngbyatoxin A, 15 (Abst.)
Dermatology, 1, 9, 13 (Absts.)
Desensitization, antigen-specific, of human basophils, 15 (Abst.)
Diabetes mellitus, volatile, and severe asthma in same patient; treatment dilemma (Tinkelman D, King S), 223 (Allergy grand rounds)
Dialyzable leukocyte extracts (DLEs) with transfer factor activity, effects of, on leukocyte migration in vitro; characterization of antigen-independent migration inhibition factor in DLEs as neutrophil immobilizing factor (Wilson GB et al), 56
Diurnal expiratory flow after inhalation of Freons and fenoterol in childhood asthma (Graff-Lonnevig V), 534
Dose, single daily, prednisone therapy, 11 (Abst.)
Drug(s) challenge, 667-674
efficacy, evaluation of, use of provocation techniques for (Spector SL), 677
-induced respiratory disease, 12 (Abst.)
oral antiasthmatic, assessment of, by inhalation challenges (Falliers CJ), 685

E

EAC3 rosette formation by lymphocytes from normal and asthmatic subjects, differential effects of pharmacologic agents on (Kohn BA et al), 182
Eastern, Western, and amalgamation; historical review of American Academy of Allergy (Cohen SG), 353
Ecteinascidia turbinata extract, splenocytes from mice treated with, suppressor activity of, 14 (Abst.)
Ecto-5′-nucleotidase deficiency, lymphocyte, in agammaglobulinemia, 6 (Abst.)
Editorial; bronchoprovocation (Rosenthal RR), 561 (Editorial)
Education; historical review of American Academy of Allergy (Cohen SG), 412
Efficacy, drug, evaluation of, use of provocation techniques for (Spector SL), 677
Eosinophil(s), blood, and T lymphocytes in early infancy in relation to heredity for allergy and type of feeding (Juto P, Strannegård Ö), 38
role of (Kay AB), 90 (Postgraduate course presentation: Mechanisms of hypersensitivity; cellular interactions)
Eosinophilia and immunologic reactivity (Parillo JE et al), 113
Epidemiologic and medical-legal aspects of occupational asthma (Weill H), 662
Evaluation, self-; historical review of American Academy of Allergy (Cohen SG), 424
Exercise bronchoprovocation test; standardization of procedures and evaluation of response (Cropp GJA), 627
challenge; indications, techniques, and data analysis, 604-645
testing of asthmatics, guidelines for methodology of (Eggleston PA et al), 642
-induced asthma, evaluation of pharmacotherapy for (Anderson S et al), 612
laboratory evaluation of; methodologic considerations (Eggleston PA), 604
bronchospasm, comparison of effectiveness of free-running and treadmill exercise for assessing, in clinical practice (Shapiro GG et al), 609
studies of, statistical considerations in (Johnson JD), 634
testing, risk factors in (Trautlein JJ), 625
Expiratory flow, diurnal, after inhalation of Freons and fenoterol in childhood asthma (Graff-Lonnevig V), 534
Extract(s) house dust, commercial preparations of, allergenic and biologic activity of (Siraganian RP et al), 526
pollen, measurement of potency of, by radioimmunoprecipitation (Leiferman KM et al), 173
preparations, different, comparison of, with clinical history, skin test, and provocation tests; RAST in diagnosis of hypersensitivity to dog and cat allergens, 8 (Abst.)

F

Families, atopic, IgE and IgG_4 subclass in, 2 (Abst.)
Feeding, type of, and heredity for allergy, T lymphocytes and blood eosinophils in early infancy in relation to (Juto P, Strannegård Ö), 38
Fenoterol and Freons, diurnal expiratory flow after inhalation of, in childhood asthma (Graff-Lonnevig V), 534
Fetal organs, human, lymphoid cells from, effect of thymosin on (Suzuki S et al), 522
Food allergy, transient hypogammaglobulinemia, and elevated IgE levels (Fineman SM et al), 216
Foreword; historical review of American Academy of Allergy (Cohen SG), 332
issues (Cohen SG), 467 (Presidential addresses)
Foundation of America, Asthma and Allergy; historical review of American Academy of Allergy (Cohen SG), 399
Freons and fenoterol, diurnal expiratory flow after inhalation of, in childhood asthma (Graff-Lonnevig V), 534
Fungus exposure risks associated with animal care units (Burge H et al), 29
Ganoderma antigen, human sensitization to (Tarlo SM et al), 43

G

Ganoderma antigen, human sensitization to (Tarlo SM et al), 43
Government and medicine; self-regulation or government control (Schaeffer M), 479 (Robert A. Cooke Memorial Lecture)
Graft(s), allogeneic-marrow, human recipients of, antileukemic effect of graft-versus-host disease in, 15 (Abst.)
-versus-host disease, antileukemic effect of, in human recipients of allogeneic-marrow grafts, 15 (Abst.)
human, aberrations of suppressor T cells in, 14 (Abst.)
Grass pollen hay fever, nasal challenge testing in (Schumacher MJ, Pain MCF), 202
Growth, with special reference to, long-term treatment with beclomethasone dipropionate aerosol in asthmatic children, 21 (Abst.)
Guidelines for methodology of exercise challenge testing of asthmatics (Eggleston PA et al), 642

H

Hay fever and asthma, 1, 9, 13, 17 (Absts.)
grass pollen, nasal challenge testing in (Schumacher MJ, Pain MCF), 202

Hay fever—Cont'd
ragweed, cutaneous nasal allergic responses in; lack of clinical and histopathologic correlation with late phase reactions (Richerson HB et al), 67
Heat-labile and heat-stable antibody to complex salts of platinum, passive transfer in man and monkey of type I allergy due to, 3 (Abst.)
Helminthic parasite death, mechanism for (Kay AB), 90 (Postgraduate course presentation: Mechanisms of hypersensitivity; cellular interactions)
Hereditary C2 deficiency associated with common variable immunodeficiency, 19 (Abst.)
Heredity for allergy and type of feeding, T lymphocytes and blood eosinophils in early infancy in relation to (Juto P, Strannegård Ö), 38
Hepatic macrophages (Kupffer's cells) in humans, bone marrow origin of, 6 (Abst.)
Histamine or cholinergic and antigen inhalation challenge, indications for (Rosenthal RR et al), 603
-1 and histamine-2 antagonists, effect of, on airway responses to histamine in rhesus monkey (Greenberger P et al), 189
inhaled, in asthma, physiologic effects of; reversible changes in pulmonary mechanics and total lung capacity (Bleecker ER et al), 597
and methacholine, reactivity characteristics to, in asthmatic patients (Spector SL, Kinsman RA), 587
release and complement changes following injection of contrast media in humans (Cogen FC et al), 299
Historical review, American Academy of Allergy (Cohen SG), 332
introduction to (Dworetzky M), 331
History, clinical, skin test, and provocation tests, comparison of different extract preparations with; RAST in diagnosis of hypersensitivity to dog and cat allergens, 8 (Abst.)
Hodgkin's disease, advanced, immunological monitoring during chemotherapy for, 20 (Abst.)
Honors and awards; historical review of American Academy of Allergy (Cohen SG), 440
House dust extract, commercial preparations of, allergenic and biologic activity of (Siraganian RP et al), 526
mites, population of, in North American city, seasonal variation in (Murray AB, Zuk P), 266
Hymenoptera venoms (Yunginger JW), 1 (Editorial)
Hypereosinophilic syndrome, immunologic reactivity in (Parillo JE et al), 113
Hyperimmunoglobulin E syndrome; response to transfer factor and ascorbic acid therapy, 6 (Abst.)
Hyperpermeability and hyperreactivity, airway, relationship between, in *Ascaris*-sensitive monkeys (Boucher RC et al), 197
Hyperplasia, nodular lymphoid, selective IgA deficiency associated with (Jacobson KW, deShazo RD), 516
Hyperreactivity, bronchial, in the bronchus obstruction after inhalation of cat dander allergen, study on the significance of (Neijens HJ et al), 507
and hyperpermeability, airway, relationship between, in *Ascaris*-sensitive monkeys (Boucher BC et al), 197
Hypersensitivity to dog and cat allergens, RAST in diagnosis of; comparison of different extract preparations with clinical history, skin test, and provocation tests, 8 (Abst.)
IgE-mediated, to pancreatic extract in parents of cystic fibrosis children, 8 (Abst.)
insect; state of the art (Lichtenstein LM et al), 5
to nonsteroidal antiinflammatory drugs; indications and methods for oral challenges (Mathison DA, Stevenson DD), 669
pneumonitis, diagnosis of, use of bronchoprovocation in (Fink JN), 590
reactions, tissue, basophil arrival and function in (Askenase PW), 79 (Postgraduate course presentation: Mechanisms of hypersensitivity; cellular interactions)
Hypogammaglobulinemia, transient, elevated IgE levels, and food allergy (Fineman SM et al), 216
Hyporesponsiveness to particulate antigen, induction of, by feeding; sequence of immunologic response to fed antigen (David MF), 164
Hyposensitization, specific, of respiratory allergies with new, tetrahydrofuran-treated semi-depot extract; two-year study of effects and side effects, 18 (Abst.)
Hypoxia and the pregnant asthmatic, 17 (Abst.)

I

Idiosyncrasy(ies), aspirin and tartrazine, evaluation of (Farr RS et al), 667
concomitant, and aspirin in adult asthmatic patients (Spector SL et al), 500
Immune complexes, detection of, on surface of polymorphonuclear neutrophils, 5 (Abst.)
Immunity and allergy to insect sting (Resiman RE), 3 (Editorial)
Immunization, active/passive, altered immune response following; additional evidence against measles vaccine administration to infants less than 12 months of age, 11 (Abst.)
Immunochemical properties of some atopic allergens (King TP), 159 (Postgraduate course presentation)
Immunodeficiency, variable, common, hereditary C2 deficiency associated with, 19 (Abst.)
Immunoglobulin A deficiency, selective, associated with nodular lymphoid hyperplasia (Jacobson KW, deShazo RD), 516
receptor for, on human T lymphocytes, 10 (Abst.)
binding of, and activation of complement by asbestos fibers (Hasselbacher P), 294
D, human, structure and biological function of; T and B lymphocytes in pityriasis rosea, 9 (Abst.)
E antibodies, stability of, 20 (Abst.)
suppression of, with modified allergens (Sehon AH, Lee WY), 242 (Postgraduate course presentation)
to cow's-milk protein in breast-fed atopic children (Kaplan MS, Solli NJ), 122
–dependent reaction in man, activation of coagulation system in, evidence for; late phase skin reaction, 7 (Abst.)
elevated, atopic dermatitis associated with, suppressor cell function in (Schuster DL et al), 139
and IgG_4 subclass in atopic families, 2 (Abst.)
levels, elevated, transient hypogammaglobulinemia, and food allergy (Fineman SM et al), 216
–mediated hypersensitivity to pancreatic extract in parents of cystic fibrosis children, 8 (Abst.)
response during viral infections (Perelmutter L et al), 127
myasthenic, effect of, on acetylcholine receptors of intact mammalian neuromuscular junctions, 19 (Abst.)
Immunologic and clinical studies of venom immunotherapy, 10 (Abst.)
and coagulation disorders in chlorpromazine-treated patients, 20 (Abst.)
monitoring during chemotherapy for advanced Hodgkin's disease, 20 (Abst.)
reactivity in hypereosinophilic syndrome (Parillo JE et al), 113
response to fed antigen, sequence of; induction of hyporesponsiveness to particulate antigen by feeding (David MF), 164
studies in patients with alopecia areata, 1 (Abst.)
Immunology, 2, 5, 10, 14, 19 (Absts.)
clinical, and allergy; fifty years from now (Samter M), 321
Journal of, fiftieth anniversary (Reed CE), 305
Immunotherapy, allergen, clinical efficacy of (Patterson R), 155 (Postgraduate course presentation)
venom, clinical and immunological studies of, 10 (Abst.)
Indications for inhalation challenge (Rosenthal RR et al), 603

Indications—Cont'd
and methods for oral challenges; hypersensitivity to nonsteroidal antiinflammatory drugs (Mathison DA, Stevenson DD), 669
Infancy, early, T lymphocytes and blood eosinophils in, in relation to hereditary for allergy and type of feeding (Juto P, Strannegård Ö), 38
Infant(s) less than 12 months of age, measles vaccine administration to, additional evidence against; altered immune response following active/passive immunization, 11 (Abst.)
young, theophylline pharmacokinetics in, 21 (Abst.)
Inflammatory, anti-, nonsteroidal drugs, hypersensitivity; indications and methods for oral challenges (Mathison DA, Stevenson DD), 669
Infections, viral, IgE response during (Perelmutter L et al), 127
Inhalation challenge(s), assessment of oral antiasthmatic drugs by (Falliers CJ), 685
bronchial, with antigens (Spector S, Farr R), 580
emerging role of bronchoprovocation (Rosenthal RR), 564
indications for (Rosenthal RR et al), 603
and pharmacologic studies of toluene diisocyanate (TDI)–sensitive workers (Butcher BT et al), 146
procedures, indications, and techniques, 564-603
studies, methacholine (Townley RG et al), 569
testing with toluene diisocyanate (Butcher BT), 655
Inhaled histamine in asthma, physiologic effects of; reversible changes in pulmonary mechanics and total lung capacity (Bleecker ER et al), 597
In memoriam, 304
Insect(s), allergy to, in Japan; reaginic sensitivity to silkworm moth in patients with bronchial asthma (Kino T, Oshima S), 131
state of the art (Lichtenstein LM et al), 5
sting (Yunginger JW), 1 (Editorial)
allergy to (Reisman RE), 3 (Editorial)
Interferon synthesis by human colostral leukocytes, 4 (Abst.)
Intermittant positive-pressure breathing, salbutamol given by, and intravenously, comparison of, in life-threatening asthma, 21 (Abst.)
International activities; historical review of American Academy of Allergy (Cohen SG), 405
Introduction to proceedings of workshop on bronchoprovocation (Rosenthal RR et al), 563
use of challenge for clinical trials (Herzig D), 675
Ionophore A23187, cytotoxicity of, for basophils and other human blood cells (Pruzansky JJ, Patterson R), 50
Irreverent recollections from Cooke and Coca, 1928-1978 (Chase MW), 306
Isoproterenol and albuterol in bronchial asthma, 9 (Abst.)
Issues; foreword (Cohen SG), 467 (Presidential addresses)

J

Japan, allergy to insects in; reaginic sensitivity to silkworm moth in patients with bronchial asthma (Kino T, Oshima S), 131
Journal of Allergy and Clinical Immunology; fiftieth anniversary (Reed CE), 305
Journal of Allergy; publications; historical review of American Academy of Allergy (Cohen SG), 362

K

Kinetics of theophylline in young infant, 21 (Abst.)
Kupffer's cells in humans, bone marrow origin of, 6 (Abst.)

L

Laboratory evaluation of exercise-induced asthma; methodologic considerations (Eggleston PA), 604
Late phase reactions, lack of clinical and histopathologic correlations with; cutaneous nasal allergic responses in ragweed hay fever (Richerson HB et al), 67
Late phase—Cont'd
skin reaction; evidence for activation of coagulation system in IgE-dependent reaction in man, 7 (Abst.)
Latency period of sensitization; inhibition of passive cutaneous anaphylaxis by factor in normal rat serum, 5 (Abst.)
Legal, medical-, and epidemiologic aspects of occupational asthma (Weill H), 662
Leukemic, anti-, effect of graft-versus-host disease in human recipients of allogeneic-marrow grafts, 15 (Abst.)
Leukocyte(s), basophil, and mast cells in human nasal secretions and scrapings studied by light microscopy, 13 (Abst.)
colostral, human, interferon synthesis by, 4 (Abst.)
migration in vitro, effects of dialyzable leukocyte extracts (DLEs) with transfer factor on; characterization of antigen-independent migration inhibition factor in DLEs as neutrophil immobilizing factor (Wilson GB et al), 56
Liaison and cooperative endeavors; historical review of American Academy of Allergy (Cohen SG), 428
Light microscopy, basophil leukocytes and mast cells in human nasal secretions and scrapings studied by, 13 (Abst.)
Lung capacity, total, and pulmonary mechanics, reversible changes in; physiologic effects of inhaled histamine in asthma (Bleecker ER et al), 597
tissue, human and guinea pig, prostaglandin generation by; comparison of parenchymal and airway responses (Steel L et al), 287
Lymphocyte(s) ecto-5'-nucleotidase deficiency in agammaglobulinemia, 6 (Abst.)
from normal and asthmatic subjects, EAC3 rosette formation by, differential effects of pharmacologic agents on (Kohn BA et al), 182
-stimulating property and allergenicity of rice protein (Shibasaki M et al), 259
stimulation with phorbol myristate acetate in atopic and nonatopic individuals, 2 (Abst.)
T and B, in pityriasis rosea; structure and biological function of human IgD, 9 (Abst.)
and blood eosinophils in early infancy in relation to heredity for allergy and type of feeding (Juto P, Strannegård Ö), 38
human, receptor for IgA on, 10 (Abst.)
Lymphoid cells from human fetal organs, effect of thymosin on (Suzuki S et al), 522
hyperplasia, nodular, selective IgA deficiency associated with (Jacobson KW, deShazo RD), 516
Lyngbyatoxin A, structure of; seaweed dermatitis, 15 (Abst.)

M

Macrophage(s), hepatic (Kupffer's cells), in humans, bone marrow origin of, 6 (Abst.)
human, migration inhibition factor; evidence for subunit structure, 14 (Abst.)
Malnutrition, childhood, defective *Candida* killing in, 19 (Abst.)
Mast cells and basophil leukocytes in human nasal secretions and scrapings studied by light microscopy, 13 (Abst.)
Mammalian neuromuscular junctions, intact, effect of myasthenic Ig on acetylcholine receptors of, 19 (Abst.)
Measles vaccine administration to infants less than 12 months of age, additional evidence against; altered immune response following active/passive immunization, 11 (Abst.)
Measurements of responsiveness in bronchoprovocation testing (Fish JE, Kelly JF), 592
Mechanics, pulmonary, and total lung capacity, reversible changes in; physiologic effects of inhaled histamine in asthma (Bleecker ER et al), 597
Mechanisms and overview; occupational asthma (Salvaggio JE), 646
Medical-legal and epidemiologic aspects of occupational asthma (Weill H), 662

Medicine and government; self-regulation or government control (Schaeffer M), 479 (Robert A. Cooke Memorial Lecture)
Methacholine and antigen challenge in children with asthma (Chai H), 575
and histamine, reactivity characteristics to, in asthmatic patients (Spector SL, Kinsman RA), 587
inhalation challenge studies (Townley RG et al), 569
Methods and indications for oral challenges; hypersensitivity to nonsteroidal antiinflammatory drugs (Mathison DA, Stevenson DD), 669
Methodologic considerations; laboratory evaluation of exercise-induced asthma (Eggleston PA), 604
Methodology of exercise challenge testing of asthmatics, guidelines for (Eggleston PA et al), 642
Microscopy, light, basophil leukocytes and mast cells in human nasal secretions and scrapings studied by, 13 (Abst.)
Migration, human macrophage, inhibition factor; evidence for subunit structure, 14 (Abst.)
leukocyte, in vitro, effects of dialyzable leukocyte extracts (DLEs) with transfer factor on; characterization of antigen-independent migration inhibition factor in DLEs as neutrophil immobilizing factor (Wilson GB et al), 56
Mites, house dust, population of, in North American city, seasonal variation in (Murray AB, Zuk P), 266
Mitogens, different, induced by, prostaglandin and cyclic AMP analogues of blastogenesis; selective suppression by adherent cells, 16 (Abst.)
Monitoring, immunological, during chemotherapy for advanced Hodgkin's disease, 20 (Abst.)
Monocyte-mediated cytotoxicity, antibody-dependent, in severe atopic dermatitis, 13 (Abst.)
Myasthenic Ig, effect of, on acetylcholine receptors of intact mammalian neuromuscular junctions, 19 (Abst.)

N

Nasal allergic responses, cutaneous, in ragweed hay fever; lack of clinical and histopathologic correlations with late phase reactions (Richerson HB et al), 67
challenge testing in grass pollen hay fever (Schumacher MJ, Pain MCF), 202
secretions and scrapings, human, basophil leukocytes and mast cells in, studied by light microscopy, 13 (Abst.)
Neuromuscular junctions, mammalian, intact, effect of myasthenic Ig on acetylcholine receptors of, 19 (Abst.)
Neutrophil(s) chemotactic activity, ragweed antigen–induced, in man, further characterization and biologic activity of (Atkins PC et al), 251
factors, relevance of, to allergic disease (Wasserman SI, Center DM), 231 (Editorial)
immobilizing factor, characterization of antigen-independent migration inhibition factor in dialyzable leukocyte extracts (DLEs) as; effects of DLEs with transfer factor on leukocyte migration in vitro (Wilson GB et al), 56
polymorphonuclear, surface of, detection of immune complexes on, 5 (Abst.)
Nodular lymphoid hyperplasia, selective IgA deficiency associated with (Jacobson KW, deShazo RD), 516
Noncompliance in asthmatic children; study of theophylline levels in pediatric emergency room population, 18 (Abst.)

O

Occupational asthma, 646-666
epidemiologic and medical-legal aspects of (Weill H), 662
overview and mechanisms (Salvaggio JE), 646
study session on (Chester EH, Schwartz HJ), 665
Ocular administration, topical, of cromolyn sodium for treatment in seasonal ragweed conjunctivitis (Welsh PW et al), 209
Oral antiasthmatic drugs, assessment of, by inhalation challenges (Falliers CJ), 685
Oral—Cont'd
challenges, indications and methods for; hypersensitivity to nonsteroidal antiinflammatory drugs (Mathison DA, Stevenson DD), 669
Overview and mechanisms; occupational asthma (Salvaggio JE), 646
Oxymetholone (impeded androgen) therapy of hereditary angioedema, clinical and biochemical effects of (Sheffer AL et al), 275

P

Pancreatic extract, IgE-mediated hypersensitivity to, in parents of cystic fibrosis children, 8 (Abst.)
Parasite, helminthic, death, mechanism for (Kay AB), 90 (Postgraduate course presentation: Mechanisms of hypersensitivity; cellular interactions)
Parenchymal and airway responses, comparison of; prostaglandin generation by human and guinea pig lung tissue (Steel L et al), 287
Parents of cystic fibrosis children, IgE-mediated hypersensitivity to pancreatic extract in, 8 (Abst.)
Passive cutaneous anaphylaxis, inhibition of, by factor in normal rat serum; latency period of sensitization, 5 (Abst.)
transfer in man and monkey of type I allergy due to heat-labile and heat-stable antibody to complex salts of platinum, 3 (Abst.)
Pathology, pharmacology, and physiology, 4, 11, 15, 20 (Absts.)
Pediatric(s), 8, 11, 19 (Absts.)
emergency room population, study of theophylline levels in; noncompliance in asthmatic children, 18 (Abst.)
Pharmacologic agents, differential effects of, on EAC3 rosette formation by lymphocytes from normal and asthmatic subjects (Kohn BA et al), 182
alteration of histamine-induced respiratory responses (Greenberger P et al), 189
studies and inhalation challenge in toluene diisocyanate (TDI)–sensitive workers (Butcher BT et al), 146
Pharmacology, physiology, and pathology, 4, 11, 15, 20 (Absts.)
Pharmacotherapy, evaluation of, for exercise-induced asthma (Anderson S et al), 612
Phorbol myristate acetate, lymphocyte stimulation with, in atopic and nonatopic individuals, 2 (Abst.)
Physiologic effects of inhaled histamine in asthma; reversible changes in pulmonary mechanics and total lung capacity (Bleecker ER et al), 597
Physiology, pathology, and pharmacology, 4, 11, 15, 20 (Absts.)
Pituitary-adrenal axis, suppression of; single daily dose prednisone therapy, 11 (Abst.)
Pityriasis rosea, T and B lymphocytes in; structure and biological function of human IgD, 9 (Abst.)
Platinum, complex salts of, heat-labile and heat-stable antibody to, passive transfer in man and monkey of type I allergy due to, 3 (Abst.)
Pneumonitis, hypersensitivity, diagnosis of, use of bronchoprovocation in (Fink JN), 590
Pollen, composite, ingestion, acute allergic reaction after (Cohen SH et al), 270
extracts, measurement of potency of, by radioimmunoprecipitation (Leiferman KM et al), 173
grass, hay fever, nasal challenge testing in (Schumacher MJ, Pain MCF), 202
Polymorphonuclear neutrophils, surface of, detection of immune complexes on, 5 (Abst.)
P pulmonale in status asthmaticus (Gelb AF et al), 18
Prednisone therapy, single daily dose, 11 (Abst.)
Pregnancy and asthma, 17 (Abst.)
Preservatives, aspirin, azo dyes, and non-azo dyes, incidence of bronchoconstriction due to, in population of perennial asthmatics (Weber RW et al), 32
Presidents of state, regional, and local allergy societies as of January, 1979, listing of, 228

Procedures, standardization of, and evaluation of response; exercise bronchoprovocation test (Cropp GJA), 627
Prostaglandin and cyclic AMP analogues of blastogenesis induced by different mitogens; selective suppression by adherent cells, 16 (Abst.)
generation by human and guinea pig lung tissue; comparison of parenchymal and airway responses (Steel L et al), 287
Protein, rice, allergenicity and lymphocyte-stimulating property of (Shibasaki M et al), 259
Provocation techniques, use of, for evaluation of drug efficacy (Spector SL), 677
Publications; Journal of Allergy; historical review of American Academy of Allergy (Cohen SG), 362
Pulmonary mechanics and total lung capacity, reversible changes in; physiologic effects of inhaled histamine in asthma (Bleecker ER et al), 597

R

Radioallergoborbent test in diagnosis of hypersensitivity to dog and cat allergens; comparison of different extract preparations with clinical history, skin test, and provocation tests, 8 (Abst.)
Radioimmunoprecipitation, measurement of potency of pollen extracts by (Leiferman KM et al), 173
Ragweed AgE, structure and activity of; allergenic crossreactivity of subunits (Paull BR et al), 539
antigen–induced neutrophil chemotactic activity in man, further characterization and biologic activity of (Atkins PC et al), 251
conjunctivitis, seasonal, treatment in, topical ocular administration of cromolyn sodium for (Welsh PW et al), 209
hay fever, cutaneous nasal allergic responses in; lack of clinical and histopathologic correlations with late phase reactions (Richerson HB et al), 67
Reaction, acute allergic, after composite pollen ingestion (Cohen SH et al), 270
Reactivity, bronchial, nonspecific, and airways response to allergens, relationship between (Nathan RA et al), 491
characteristics to methacholine and histamine in asthmatic patients (Spector SL, Kinsman RA), 587
immunologic, in hypereosinophilic syndrome (Parillo JE et al), 113
Reactors and nonreactors to contrast media, different complement values in (Lasser EC et al), 105
Reaginic sensitivity to silkworm moth in patients with bronchial asthma; allergy to insects in Japan (Kino T, Oshima S), 131
Receptor(s), acetylcholine, of intact mammalian neuromuscular junctions, effect of myasthenic Ig on, 19 (Abst.)
for IgA on human T lymphocytes, 10 (Abst.)
Recollections, irreverent, from Cooke and Coca, 1928-1978 (Chase MW), 306
Regulation, self-, or government control; medicine and government (Schaeffer M), 479 (Robert A. Cooke Memorial Lecture)
Research; historical review of American Academy of Allergy (Cohen SG), 390
Respiratory allergies, specific hyposensitization of, with new, tetrahydrofuran-treated semi-depot extract; two-year study of effects and side effects, 18 (Abst.)
disease, drug-induced, 12 (Abst.)
Response(s), evaluation of, and standardization of procedures; exercise bronchoprovocation test (Cropp CJA), 627
parenchymal and airway, comparison of; prostaglandin generation by human guinea pig lung tissue (Steel L et al), 287
Responsiveness, measurements of, in bronchoprovocation testing (Fish JE, Kelly JF), 592
Review, historical, introduction to (Dworetzky M), 331
Reviewers, acknowledgment to, 475
Rice protein, allergenicity and lymphocyte-stimulating property of (Shibasaki M et al), 259
Risk factors in exercise testing (Trautlein JJ), 625
Rosette, EAC3, formation by lymphocytes from normal and asthmatic subjects, differential effects of pharmacologic agents on (Kohn BA al), 182
Running, free-, and treadmill exercise, comparison of effectiveness of, for assessing exercise-induced bronchospasm in clinical practice (Shapiro GG et al), 609

S

Salbutamol given intravenously and by intermittent positive-pressure breathing, comparison of, in life-threatening asthma, 21 (Abst.)
Seasonal variation in population of house dust mites in North American city (Murray AB, Zuk P), 266
Seaweed dermatitis; structure of lyngbyatoxin A, 15 (Abst.)
Self-evaluation; historical review of American Academy of Allergy (Cohen SG), 424
Sensitivity, methacholine, and inhalation challenge studies (Townley RG et al), 569
Sensitization, latency period of; inhibition of passive cutaneous anaphylaxis by factor in normal rat serum, 5 (Abst.)
to nonvenom contaminants in venom preparation (Reisman RE et al), 281
Serum, normal rat, inhibition of passive cutaneous anaphylaxis by factor in; latency period of sensitization, 5 (Abst.)
Side effects and effects, two-year study of; specific hyposensitization of respiratory allergies with new, tetrahydrofuran-treated semi-depot extract, 18 (Abst.)
Silkworm moth, reaginic sensitivity to, in patients with bronchial asthma; allergy to insects in Japan (Kino T, Oshima S), 131
Skin reaction, late phase; evidence for activation of coagulation system in IgE-dependent reaction in man, 7 (Abst.)
test, clinical history, and provocation tests, comparison of different extract preparations with; RAST in diagnosis of hypersensitivity to dog and cat allergens, 8 (Abst.)
reactivity and cardiovascular parameters, effect of selective beta$_2$ adrenergic agonist and theophylline on (Spector SL), 23
Society(ies), allergy, state, regional, and local, listing of presidents of, as of January, 1979, 228
for study of Asthma and Allied Conditions; historical review of American Academy of Allergy (Cohen SG), 342
Splenocytes, suppressor activity of, from mice treated with *Ecteinascidia turbinata* extract, 14 (Abst.)
Standards and certification; historical review of American Academy of Allergy (Cohen SG), 375
for conduct of clinical trials and evaluation of bronchodilator drugs (Rosenthal RR), 689
State of allergy (Black JH), 469 (Presidential addresses)
Statistical considerations in studies of exercise-induced bronchospasm (Johnson JD), 634
Status asthmaticus, P pulmonale in (Gelb AF et al), 18
Steroidal, non-, antiinflammatory drugs, hypersensitivity to; indications and methods for oral challenges (Mathison DA, Stevenson DD), 669
Sting, insect (Yunginger JW), 1 (Editorial)
allergy to (Reisman RE), 3 (Editorial)
Structure of lyngbyatoxin A; seaweed dermatitis, 15 (Abst.)
subunit, evidence for; human macrophage migration inhibition factor, 14 (Abst.)
Study session on occupational asthma (Chester EH, Schwartz HJ), 665
Subunits, allergenic crossreactivity of; structure and activity of ragweed AgE (Paull BR et al), 539
Suppression, selective, by adherent cells; prostaglandin and cyclic AMP analogues of blastogenesis induced by different mitogens, 16 (Abst.)

Suppressor activity of splenocytes from mice treated with *Ecteinascidia turbinata* extract, 14 (Abst.)
cell function in atopic dermatitis associated with elevated IgE (Schuster DL et al), 139
nonspecific, function in atopic subjects (Martinez JD et al), 485
T cells, aberrations of, in human graft-versus-host disease, 14 (Abst.)
in human allergic disease (Geha RS), 477 (Editorial)

T

Tartrazine and aspirin idiosyncrasy, evaluation of (Farr RS et al), 667
T cells, suppressor, aberrations of, in human graft-versus-host disease, 14 (Abst.)
in human allergic disease (Geha RS), 477 (Editorial)
Techniques, bronchial challenge; introduction to proceedings of workshop on (Rosenthal RR), 563
Temperatures, low, stability of IgE antibodies stored at, 20 (Abst.)
Tests, provocation, skin test, and clinical history, comparison of different extract preparations with; RAST in diagnosis of hypersensitivity to dog and cat allergens, 8 (Abst.)
Testing, nasal challenge, in grass pollen hay fever (Schumacher MJ, Pain MCF), 202
Tetrahydrofuran-treated semi-depot extract, new, specific hyposensitization of respiratory allergies with; two-year study of effects and side effects, 18 (Abst.)
T lymphocytes and blood eosinophils in early infancy in relation to heredity for allergy and type of feeding (Juto P, Strannegård Ö), 38
Toluene diisocyanate–induced asthma, bronchoprovocation tests in, proposed standardized method for (Gerblich AA et al), 658
inhalation challenge testing with (Butcher BT), 655
–sensitive workers, inhalation challenge and pharmacologic studies of (Butcher BT et al), 146
Theophylline levels in pediatric emergency room population; noncompliance in asthmatic children, 18 (Abst.)
pharmacokinetics in young infant, 21 (Abst.)
Theophylline—Cont'd
and selective beta$_2$ adrenergic agonist, effect of, on skin test reactivity and cardiovascular parameters (Spector SL), 23
Thymosin, effect of, on lymphoid cells from human fetal organs (Suzuki S et al), 522
Transfer factor activity, dialyzable leukocyte extracts (DLEs) with, effects of, on leukocyte migration in vitro; characterization of antigen-independent migration inhibition factor in DLEs as neutrophil immobilizing factor (Wilson GB et al), 56
and ascorbic acid therapy, response to; hyperimmunoglobulin E syndrome, 6 (Abst.)
Treadmill exercise and free-running, comparison of effectiveness of, for assessing exercise-induced bronchospasm in clinical practice (Shapiro GG et al), 609
Treatment dilemma; severe asthma and volatile diabetes mellitus in same patient (Tinkelman D, King S), 223 (Allergy grand rounds)
Trials, bronchoprovocation (Rosenthal RR), 561 (Editorial)

V

Vaccine, measles, administration to infants less than 12 months of age, additional evidence against; altered immune response following active/passive immunization, 11 (Abst.)
Venom(s), *Hymenoptera* (Yunginger JW), 1 (Editorial)
immunotherapy, clinical and immunological studies of, 10 (Abst.)
preparation, nonvenom contaminants in, sensitization to (Reisman RE et al), 281
Viewpoint, new, on allergy (Bullens SS), 472 (Presidential addresses)
Viral infections, IgE response during (Perelmutter L et al), 127

W

Western, Eastern, and amalgamation; historical review of American Academy of Allergy (Cohen SG), 353
Workers, toluene diisocyanate (TDI)–sensitive, inhalation challenge and pharmacologic studies of (Butcher BT), 146
